

**Assessment:**

Students will be grouped into groups of 4. Each group will be assigned a section of Dr. Ray's article: paper, printing, gunpowder, or compass. Each student will be given a copy of their section and each group will be given one piece of construction paper.

Students will be instructed to quietly read their section and then write a summary on the article inside one of the 4 outside sections on the construction paper. Once all students in the group have finished writing their summary, each student will take a turn to read their summary to the group. While the student is reading the other members of the group are to be listening for details that are repeated.

Once all students have shared their summary, the group will write a group summary inside the middle of their construction paper.

Once all groups are finished, all groups will share their summary with the class.
